

## Job Postings – January 2012

### Job Title:

## 5 axis Router Product Manager (Dallas)

**1 Opening**

Located in Dallas, TX, MultiCam is looking for a highly self-motivated Product Specialist to grow and develop MultiCam's 5 axis router presence worldwide.

Ideal candidate will possess the following qualifications:

- Thorough understanding of 5 axis machining applications and CAD/CAM
- Responsibilities include but not limited to:
  1. Sales support – Assisting both direct sales and distribution
  2. Applications – Create and demonstrate sophisticated cutting applications
  3. Training – Ability to train internal and external customers with installation, operation, and applications
  4. CAD/CAM – Hands on experience of a leading CAD/CAM software
  5. Product Development – Work closely with customers and engineering for ongoing development
- Excellent training, motivational and problem solving skills
- Good written and oral communication skills, ability to write sales and support documentation
- Ability to travel up to 40% of the time depending on season
- College degree

This is an outstanding opportunity for the right individual to come in and grow with MultiCam as we continue to gain market share worldwide. As such, we are looking for a top notch professional that fully understands what the position entails yet at the same time can bring fresh ideas to an ever changing marketplace.

MultiCam, Inc. offers a competitive salary and benefits package including, but not limited to, medical, dental, vision, life and supplemental life insurance, LTD and 401-K.

The position is based in the Dallas/Ft Worth metroplex so relocation to the area may be required.

If you are up to the challenge, please submit your resume & salary requirement to [jobs@multicam.com](mailto:jobs@multicam.com).
