

## **CAD/CAM Software Trainer**

MultiCam is based in Dallas, TX (near DFW Airport) and manufactures robotic CNC Router, Laser, Plasma, WaterJet, and Knife Cutting machines. For two decades MultiCam has installed thousands of our CNC cutting systems around the world. A wide variety of industries depend on MultiCam CNC systems such as cabinetmaking, furniture production, woodworking, metalworking, sign making, HVAC, aerospace, marine construction, solid surface and plastics fabrication. These diverse industries find MultiCam machines to be reliable and indispensable additions to their manufacturing productivity. MultiCam maintains over 60 distributors and technology centers in over 40 countries around the world.

**MultiCam is actively seeking a qualified candidate CAM/CAD Software Trainer who can meet the following Skills & Requirements:**

- Candidate with working knowledge of different CAD/CAM programs is a plus! (AlphaCAM, Enroute, EZ G-Code and Shop Data)
- Candidate must have the ability to develop training materials and present them in a multimedia fashion
- A qualified candidate will have good mechanical skills as well as a working knowledge of algebra, trigonometry, geometry and material science
- CNC machinery experience is a plus.
- The desirable candidate will be required to travel on a limited basis, have a positive "Can Do" attitude and have the ability to work well without direct supervision.
- Additionally, the candidate must be able to pass a drug test, background check and have a good work history with credible references.

Qualified candidates please submit your resume and [salary requirements](#) to [jobs@multicam.com](mailto:jobs@multicam.com). Resumes received without the salary requirements will not be considered.
